About five years ago in Ireland almost every PC builder and re-seller signed a petition and gave it to Microsoft objecting to their anti-competitive & monopolistic behaviour. Everyone has known about this for a long time.

Freedom in America has allowed Bill Gates to become the richest man in the world. He is now using his money to take that freedom away from anyone whom he feels may become a threat to his crown.

Give the next Netscape it's freedom and split Microsoft up.
